DETAILED ACTION

Response to Arguments

1. Applicant's statements filed 9/10/07 with respect to the potential interference have been fully considered but they are not persuasive. Applicants submit that the substituents on each silicon atom of the instant claims are not simultaneously the same C₁-C₄ monoalkylamino group whereas the compounds disclosed in the '159 patent all have the same monoalkylamino group on the silicon atom. This argument is not convincing because claim 1 of the '159 patent clearly states that the monoalkylamino group substituents are independent. This means that claim 1 of '159 reads on each silicon atom not simultaneously being the same C₁-C₄ monoalkylamino group.
2. The double-patenting rejection is withdrawn.

Conclusion

3. This application is in condition for allowance/interference except for the following formal matters:

The copy of claims is unclear. Applicant is requested to submit a clear copy of the claims so that the examiner may take the next step of prosecuting this application.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
